

LENA T P

PYTHON DEVELOPER

Kannur,Kerala | lenaunnikrishnan3090@gmail.com | 9074762136 | linkedin.com/in/lena-unnikrishnan

PROFESSIONAL SUMMARY

MCA graduate and aspiring Python Developer with hands-on experience in Python, Django, SQL, and backend development. Skilled in building web applications, database-driven systems, and scalable solutions through academic and internship projects. Strong problem-solving abilities with passion for clean code and efficient application development.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, Java
- Web Technologies: HTML, CSS, JavaScript
- Databases: MySQL, SQL
- Tools & Platforms: Git, VS Code
- Core Concepts: Data Structures, OOP, DBMS, SDLC, Machine Learning

EXPERIENCE

Python Developer Intern

Wistora IQ Solutions | Jan 2026 – May 2026

- Developed backend modules using Python and Django for web-based applications
- Designed and optimized SQL databases to improve data management and query performance
- Identified and fixed application bugs to enhance performance and reliability
- Used Git for version control and collaborated with the development team
- Contributed to project development while maintaining code quality and meeting deadlines

EDUCATION

Master of Computer Applications (MCA)
APJ Abdul Kalam Technological University
CGPA: 8.02

2024 – 2026

Bachelor of Science in Computer Science
Kannur University
CGPA: 7.17

2021 – 2024

PROJECTS

Haritha Connect – Waste Collection Management System

Technologies: Python, Django, HTML, CSS, JavaScript, SQL

- Developed a web application for waste collection and complaint management
- Added complaint tracking and admin monitoring features
- Designed and managed SQL database for efficient data handling
- Built responsive and user-friendly interfaces
-

CS Dorm – Student Record Management System

Technologies: Python, HTML, CSS, JavaScript, Bootstrap, SQL

- Developed a system to manage student records and academic information
- Designed database structure for storing and retrieving student data
- Generated academic performance reports
- Created responsive frontend using Bootstrap
-

Call Guard – Scam Detection System

Technologies: Python, Machine Learning, NLP, Scikit-learn, Django

- Built a machine learning-based system to detect scam messages
- Used NLP techniques for text classification and prediction
- Developed a web interface for real-time user input and results
- Improved prediction accuracy through data preprocessing

CERTIFICATIONS

- NPTEL – Cloud IoT Edge ML
